Introduction

Foreword

Business information among the Scandinavian nations increase with each year. As a result, the need for economic information from each of these countries is also increasing. Trade fairs play an important role for trade. Company and organisation interests and needs regarding reliable and comparable information about trade fairs, therefor, are also on the rise. The purpose of this pdf publication is to serve this need. This publication contains verified and comparable statistics. Additional information about individual arrangements can be obtained from the respective trade fair organisers. For past SFC statistics for each trade fair, please visit the fairlists at www.fairlink.se.

Why exhibit at verified trade fairs?

To get the most out of a trade fair, one must select the proper trade fair for his/her exhibitions. A quantitative control of the number of visitors and exhibitors makes up the foundation of all the trade fair information. Given the statistics calculated from visitor studies made by the trade fair sponsors, an exhibitor can calculate which proportion of the visitors at a given trade fair belongs to his/her target group. Exhibiting at a verified trade fair gives added security and a correct and comparable foundation from which to base decisions.

SFC background and purpose

The Scandinavian Fair Control (SFC) was organised in 1992 by members of Fairlink (former Scandinavian Trade Fair Council). Today, many more trade fair sponsors from Norway, Sweden and Denmark have joined the SFC. The purpose of SFC is to develop both a nationally and internationally correct statistical foundation, derived from verified and comparable numbers reflecting visitor, surface and exhibitor counts, as well as an individual procurement of the same, on which trade fair sponsors, exhibitors, visitors and the general public can base their decisions. The basis of this labour is a group of regulations issued by SFC: "Provisions Regulating Trade Fair Control". This group of regulations is intended to spell out the guidelines for accounting, audits and the publication of statistics pertinent to trade fairs.

SFC organisation

The Scandinavian Fair Control (SFC) is an auxiliary organisation of Fairlink. Fairlink is an interest organisation for trade fair organisers in Scandinavia. The SFC's administration and the audits of SFC-booked arrangements is directed by KPMG in Sweden. Accounting is kept by KPMG in each of the respective countries.

Publications

The verified visitor, exhibitor and surface counts are published each year in the SFC Report. In this report the trade fairs are listed after location. The information in this report is given only in English. You can download the text above in Swedish, Norwegian and Danish at www.fairlink.se. You can also download the short version of the SFC Report 2000.

If you would like to have the paper version of SFC Report 2000, please contact Fairlink at info@fairlink.se. Price: 150 SEK (VAT excluded).

SFC Terminology

Exhibition surface

Exhibition surface is defined as the immediate showcase/exhibition surface used by and paid for by the exhibitor. When accounting for a showcase/exhibition surface, a distinction is made between indoor and outdoor surfaces. Exhibition surfaces provided free of charge to exhibitors are not included in the calculations.

Number of exhibitors

Exhibitors may be classified as either "direct" or "indirect". A direct exhibitor is one who has obtained a contract for an exhibition showcase in its entirety, or who uses a specified, clearly delineated portion of an exhibition showcase. An indirect exhibitor is one whose products or services are offered through a direct exhibitor. When accounting for number of exhibitors, one may not combine the number of direct exhibitors with the number of indirect exhibitors except when evident.

Number of visitors

The number of visitors is the sum of paid entrees, invitation cards used, and other tickets which can have been obtained by conference visitors who have had access to the trade fair grounds. Verification is primarily concerned with number of different visitors and not the number of visits. Thus, a visitor which visits a trade fair over a period of many days, is counted just once. Exhibition passes, press passes, and trade fair personnel is not calculated in the statistics.
